Matt – Yes, we have coordinated and continue to coordinate with the Corps on both the assessment of direct, secondary and cumulative impacts, and on compensatory mitigation. Of course, proper compensatory mitigation design is dependent in part upon the proper assessment of all direct, secondary and cumulative impacts.

Hope this answers your questions.

Mike

Subject: CMP NECEC

Mike,

Two questions:

1. Did the Corps coordinate with EPA regarding whether the direct, secondary, and cumulative adverse impacts were properly described in CMP's supplemental application?
2. Did the Corps coordinate with EPA regarding the appropriateness of CMP's proposed compensatory mitigation plan?

Just asking for "yes/no" answers here, not for you to reveal the substance of what EPA may have said.

Thanks.

Matt
